

# WELCOME TO ALCHEMIZE YOUR ENERGY DOWSING COURSE

We are delighted to share with you an ancient system handed down by generations of Native American shamans. The teachings, compiled and distilled into a comprehensive method, work efficiently with energy and incorporate multidimensional aspects such as Spirit World and Spirit Guides.

In our seminar you will learn to dowse using a pendulum and chart. When you have your pendulum in hand, you should get to know its feel and weight. In the first session, you will be guided how to program the four pendulum swings used in dowsing.

Dowsing is based on the premise that everything consists of energy and all energy is changeable. With dowsing, you can ask to raise your personal energy level, your living space energy level, and the energy levels of loved ones. In addition, you can ask to clear non-beneficial energies, blocks, resistance and fear, allowing the natural flow of energy to lead to a happier, healthier, and more abundant life.

Changes in the invisible energetic realms impact the visible three-dimensional world. Dowsing provides you the tools to create the changes that you seek, opening doors to work with the flexible nature of energy and revealing the tremendous role that energy plays in your life.

Dowsing is a lifelong tool – one that expands and deepens with practice. Developing and trusting your intuition and learning the art of asking questions are key to its success. The more specific your question, the greater the outcome and results you receive.

You will be working in collaboration with Spirit World to receive information, guidance, and answers. All dowsing is for the present moment; however, you can ask to go back in time and to project into the future as well.

## History of dowsing

Initially, dowsing was used to find water and was referred to as water witching. A century ago you could have seen someone walking through the woods or along a field with two wooden sticks in his hands, waiting for them to cross and indicate the site of water. Though this form of dowsing is still used to find water, it has expanded into a full art form impacting multiple areas of life such as health, business, relationships, and spirituality.

Topics we will cover - Dowsing addresses everything from distressing emotions that might plague you, to outgrown beliefs and vows, to entities. Dowsing is limitless in what it can address and cover. You will learn to remove curses and non-beneficial psychic cords and mass consciousness. You will learn the process to retrieve lost aspects of soul, to create ancestral lineage filters, and if needed, to change your degree of feeling wanted at birth.

The Tools: The pendulum and the chart. These tools allow you to ascertain and visualize the answers to your questions: yes or no and percentages. They also provide a means to measure energy levels. You will learn how to read measurements on the chart and what the ideal ranges are.

In our years of working in the healing profession, we have seen dowsing become one of the most sought-after healing modalities. The results can be life-changing.

You are getting ready to venture into a new world. It is invisible, yet it can be felt, measured, and transformed. You will become a detective searching out clues while learning specific mantras to remove obstacles and problems. And you will have fun in the process.

We are excited to welcome you to dowsing,

**Susan and Sven**
